EVENT PARTNERS:

MINICONFERENCE

Ethical AI & Digital Sustainability

How can businesses create digital value and impact – responsibly and sustainably?

The rapid development of digital technologies is reshaping how businesses take responsibility and create value. But with new opportunities come new dilemmas - from AI-driven efficiency gains to growing concerns about data waste, surveillance tech and energy consumption,

How do we ensure that data and AI are used responsibly – not just efficiently? How do we avoid creating “digital landfills” while accelerating innovation? And how can businesses stay compliant and competitive at the same time?

PROGRAMME

This miniconference is for you if you want insights into:

TANIA ELLIS
THE SOCIAL BUSINESS COMPANY

Trends & dilemmas in AI and data

Get an overview of emerging trends shaping the future of business – from AI-driven efficiency and creativity to the darker sides of surveillance tech, shadow AI and geopolitical dependencies

Tania Ellis, Event host & Trend Strategist

Data sustainability practices in action

Learn how companies can reduce their digital footprint by addressing “forever data”, legacy systems and growing data waste streams. See the business case of greener digital behaviour.

Lisa Holm, IT Sustainability Lead

ASTRID HAUG
